Experiment Number	1
Experiment Title	Build a Resume using HTML/CSS
Date of Experiment	07/01/25
Date of Submission	13/01/25

1. Objective:-

The objective of creating a resume in HTML is multifaceted and serves the following purposes:

Digital Showcase:

To have an interactive, responsive, and visually appealing digital version of my resume that can be easily shared and accessed online.

Demonstrate Technical Skills:

To showcase your proficiency in front-end development, including HTML, CSS, and styling techniques.

It highlights your ability to create structured, semantic, and professional designs.

Customization and Creativity:

Allows us to personalize the resume layout, design, and color scheme to reflect your style and professional branding.

Portfolio Integration:

As a B.Tech student, I can use this digital resume to link to my projects, GitHub repositories, LinkedIn profile, or any other professional platforms.

Interactive Features:

To make my resume dynamic and interactive, enabling features like navigation links, downloadable formats (PDF), or even animations (if desired).

Showcase Web Development Expertise:

By creating a resume in HTML, we directly demonstrate our web development skills to potential employers, adding a layer of practical demonstration to your skillset.

2. Procedure:- (Steps Followed)

Procedure for Creating a Resume in HTML

Plan the Layout:

Decide on the structure: Header (name, contact), Education, Skills, Projects, Certifications, etc.

Set Up the Environment:

Use a text editor like VS Code or any IDE of your choice.
Create an HTML file (e.g., resume.html) and a CSS file (e.g., styles.css) for styling.

Write the HTML Structure:

Use semantic tags like `<header>`, `<section>`, `<ul>`, and `<div>` to organize content.
Add placeholders for profile details, education, projects, etc.

Style with CSS:

Create a linked CSS file or use a `<style>` tag in the HTML file.
Define styles for the body, headers, lists, and sections.
Use colors, padding, margins, and fonts to make it visually appealing.

Include Links and Interactivity:

Add clickable links for email, LinkedIn, and GitHub.
Use anchor tags (`<a>`) for navigation and contact information.

Test and Debug:

Open the file in a browser to see how it looks.
Check for responsiveness on different screen sizes using CSS media queries.

Host Online:

Upload your resume to GitHub Pages or another hosting platform to make it publicly accessible.

Refine and Update:

Add more interactivity or animations if needed.
Update content periodically to keep it relevant.

3. Code:-

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-
scale=1.0">
  <title>Professional Resume</title>
  <link rel="stylesheet" href="styles.css">
  <style>
    /* Base Reset */
    * {
      margin: 0;
      padding: 0;
      box-sizing: border-box;
    }

    body {
      font-family: Arial, sans-serif;
      background-color: #f9fafb;
      color: #2c3e50;
      margin: 0;
      padding: 0;
    }

    a {
      text-decoration: none;
      color: #2980b9;
    }

    .resume-container {
      max-width: 1200px;
```
